

# Turn on Selective Sync in Omega Drive

## Enable Selective Sync

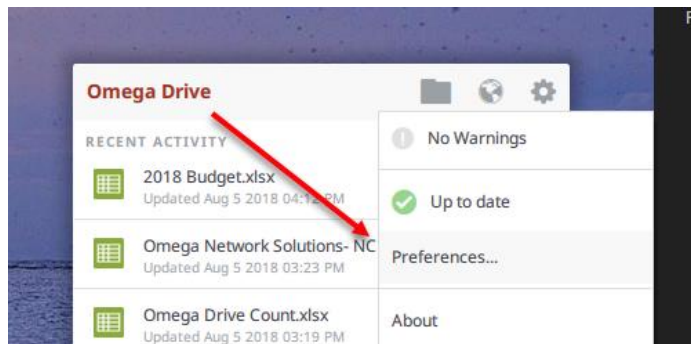

- 1) Click on the system tray icon

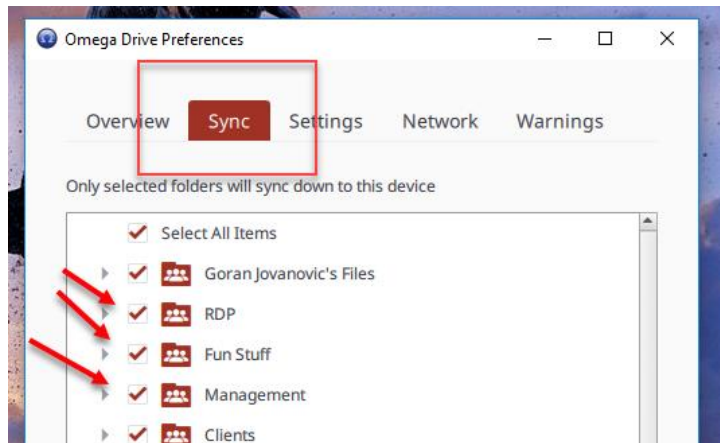

- 2) Click on the Gear/Settings Icon

- 3) Select Preferences

- 4) Select the Sync tab on the top. You will now have a list of the team shares that are sync'ed to your computer. You can uncheck the team shares you do not want to sync.

- 5) If you want to keep some of the team share you can drill into the folder and unselect a sub-directory
